Technical Skills

Programming Languages: Java , C++

Backend : Springboot , Hibernate, Microservices , REST APIs

Frontend : ReactJS , HTML/CSS, Javascript

Databases: MySQL, Postgres, MongoDB, Redis

Cloud: AWS, Docker, Kubernetes, Jenkins, Git, Gitlab

Core Subjects: Data Structures and Algorithms, Operating Systems

Miscellaneous: Design Patterns, Low Level Design, High Level Design, Kafka

Work Experience

Tata Consultancy Services

Aug 2021 – Present

Software Engineer | Java, Springboot, Microservices, JPA, Hibernate, SQL, ReactJS , AWS

Bangalore, India

- Engineered user stories and features for TCS Omnistore, a **Java, Spring Boot, Microservices** project built on a **3-tier domain-driven architecture**, utilized by clients all over the world.
- Architected and re-engineered **sale return and back office microservices** from the original monolithic architecture using agile methodologies **ensuring a 18% increase in Average Order Value** .
- Implemented Feedback content service to **enable mail notification to users**, resulting in an expansion of TCS iON customer base by 35%
- Enabled **caching to reduce latency** in network calls to improve system performance and **addressed the security issues** using SAML 2.0 and OAUTH resulting in a secure codebase .
- Created 'Process Management' functionality for tracking transaction workflow in user queue, **reducing customer churn by 23%** and enhancing overall customer satisfaction.
- Contributed to the full SDLC including **end-to-end development**, fixing complex bugs, writing unit tests and **deployment of code in production through CI/CD pipelines**.

Projects

Staydayz | ReactJS, Java, Springboot, Mongo DB, AWS

Link

- Developed and deployed a full-stack **hotel booking web application used by 250+ daily active users**, enabling seamless **browsing and booking of stays across 20+ locations**.
- Implemented user authentication (login/logout, registration)**, securing user profiles and improving data privacy.
- Designed a **booking history page**, allowing users to view and manage their previous bookings, enhancing user experience.
- Integrated Google Maps API** to display real-time vacation locations, **improving location discovery and increasing user interaction by 60%**

Taskify | ReactJS, Java, SpringBoot, Hibernate, MySQL, RESTful APIs, Docker, AWS

Link

- Built a full-stack todo application allowing users to **create, read, update, and delete tasks to enhance productivity** and task management efficiency.
- Implemented Spring Security** to enable secure login/logout and profile creation, **reducing unauthorized access attempts by 80%**
- Automated deployment using CI/CD pipelines with **AWS Lambda, Elastic Beanstalk, and Amazon S3**, improving **deployment speed by 50%**, and ensuring high **availability and scalability for 99.9% uptime**.

Achievements

- Ranked under 10 in GFG top coders in whole college.
- Solved **800+ DSA** problems including **LeetCode(500+)** and **GFG(250+)**.

Education

Heritage Institute of Technology

July 2017 - June 2021

B.Tech : Computer Science And Engineering(CSE)
